FREQUENTLY ASKED QUESTIONS

Q: Are your bottles BPA Free?

A: Yes, all of Nalgene's bottles are free of BPA, BPS, BPF and phthalates.

Q: Are Nalgene Bottles dishwasher safe?

A: Yes, but we recommend hand washing your Co-branded bottle to achieve the longest lasting imprint possible!

Q: Can I freeze my Nalgene bottle?

A: Yes, you can. However, only fill your bottle about 2/3 full to allow for expansion (and prevent cracking).

Q: Does the Nalgene Logo have to be on the bottle?

A: Yes, Nalgene will not produce your bottle unless it has the Nalgene Logo on it.

Q: Do I have to have the Grad Scale on the bottle?

A: No, it can be eliminated. If the Grad Scale is not printed on your bottle, please note that the Nalgene Logo will be printed on the front of the bottle at the very bottom.

Q: Do I have to have the BPA Free Logo on the bottle?

A: No, it can be eliminated. Just let us know when you place your order.

Q: Can I print on both sides of the bottle? / Can I print a wrap around the bottle?

A: Yes, just contact us and we will send you an Artwork Template to help you prepare your artwork file.

Q: I don't have a logo – can you help with that?

A: Yes! We have an amazingly graphic arts team that loves nothing more than to see your artwork and logo come to life. Just contact us and we will be glad to provide you with a price quote to make your logo a reality!

Q: How many colors can my logo/artwork be?

A: We can print up to 8 - PMS colors!

Q: I have specific colors in my logo – can you match them?

A: Yes! Just let us know the PMS color number and we will match them for you. You can also visit this website to find your PMS color number: <https://www.pantone.com/color-finder>

Q: How should my artwork be prepared?

A: Please let your design team know that it is imperative that they do not design the artwork in CMYK as if they were to print utilizing the Offset Printing Process. The Offset Printing Process allows you to create all colors from the four-process colors (Cyan, Magenta, Yellow, and Black). The Offset Printing Process works because the inks they use are transparent, meaning that if you lay down a square box of yellow ink and then put a matching size square box of cyan over it, you will end up with a beautiful green box.

However, we use the Screen Printing Process when producing your co-branded bottles. We do not use

FAQS continued on next page

transparent inks. We use the exact opposite, opaque inks. If you do the above process (lay down a square box of yellow ink and then put a matching size square box of cyan over it), you will end up with a square box of cyan. The reason being that the inks are opaque and will not let the underlying ink or bottle color to shine through. It is what makes the bottle printing look so sharp and clean.

Your artwork needs to be created with individual PMS colors. Do not expect overlying colors to create new colors or shades. The last color down will be the only color you will see. You can use tints of the PMS in areas where you want a light PMS 185 Red for example, but your artwork would need to be set up that way with the tint.

Q: What file type does my logo/artwork need to be?

A: We do require a Vector Format File for your artwork to insure the best print production on your bottles. Vector graphics are file types that end in **.SVG**, **.EPS**, or **.AI** types of graphic file formats, and are intrinsically different from the more common raster graphics file formats such as **.JPEG**, **.PNG**, **.APNG**, **.GIF**, and **.MPEG4**. Vector art is ideal for printing since the art is made from a series of mathematical curves. It will print very crisply even when resized.

Q: Can I have more than one bottle and cap color per order?

A: Yes, you can split a case quantity in half and have a different color bottle and cap for that half-case. For example, if you order 140 - 32oz Wide Mouth bottles that come 70 bottles per case, you can split that order into four different bottle and cap colors (35 bottles each). Please note that the artwork and ink colors need to be the same for all bottles, otherwise any change in either will cause the job to become two or more separate orders.

Q: What is the minimum order quantity?

A: Please see the attached Price List which will list the minimum order quantity per bottle style. It is also important to order by case quantity. For example, the Tritan 32oz Wide Mouth bottles come 70-bottles per case, so you will need to order in increments of 70 bottles (70, 140, 210, 280, 350, and so on), as opposed to the Tritan 16oz Narrow Mouth bottles that come 120-bottles per case, so you will need to order in increments of 120 bottles (120, 240, 360, 480, 600, and so on).

Q: What is the most popular bottle style?

A: The most popular bottle style is the 32oz Wide Mouth Tritan bottle closely followed by the Narrow Mouth option.

Q: My event is next week – am I out of luck?

A: No, not at all!!! We do offer Rush Service with an additional cost per bottle:
5-Day Rush - \$0.25, 3-Day Rush - \$0.50, 2-Day Rush - \$1.00, and 1-Day Rush - \$2.00

Q: Will I receive a proof before my bottles are produced?

A: Yes, a digital virtual proof will be emailed to you prior to production. This will usually take place within 2 -3 days after your order is submitted. It will enable you to check everything one last time before we start printing your bottles.

FAQS continued on next page

Q: When will I receive my order? / How long does it take to produce & ship?

A: Normal production time is 10 – 15 business days with one day built in for proof turn-around-time. The bottles are manufactured and shipped from Binghamton, NY 13903.

Q: How much does it cost to ship my order?

A: Shipping is FREE to a single location within the contiguous USA (48 States) via UPS Ground Service. Additional shipping fees apply to orders shipping to Alaska and Hawaii.

Q: Can I ship my order to 2 different (multiple) locations?

A: Yes, there is a fee of \$10.00 plus the cost of shipping to each additional location.

Q: Can I make changes to my order once it is placed into production?

A: You can make changes to your order or artwork after it has been submitted and prior to the digital proof approval. No additional changes can be made once the digital artwork proof has been approved, otherwise Nalgene will charge a \$50.00 fee.

Q: Can I cancel my order?

A: If you wish to cancel your order after your digital proof has been provided to you, there will be a \$100.00 fee charge to you to cover the cost of preparing your proof.
